WHAT MAKES TRADING FASTER, EASIER AND SECURE

INTRODUCTION

Global Back Office (GBO) is a web-based platform for broker-dealers designed to automate trading contract settlement and clearing.
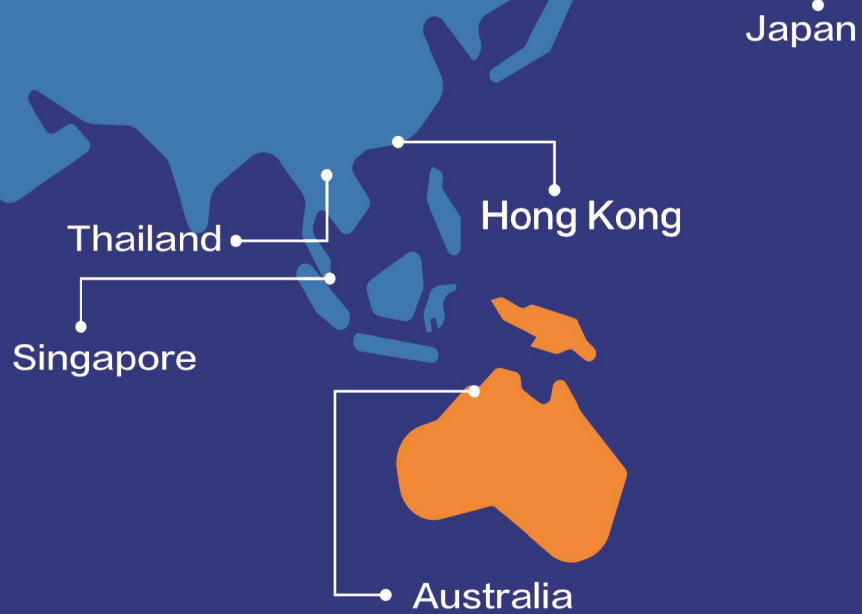

POST TRADE MANAGER

GBO brings transformative operational advantages to global post trade processing and management from trade capture through clearance and settlement, reconciliation, asset servicing, and regulatory reporting.

It streamlines and standardizes operations and infrastructure across multi asset classes, markets, currencies and business entities.

Invest in what really makes a difference, with CyberQuote's GBO technology to ensure your business is running smoothly.

- **Corporate Action Notification**
- **SBL – Security Based Lending**
- **Multi-Counter Party / Custodian Management**

WHY GBO

GBO next-generation technology delivers innovative solutions you need for sustainable growth in an increasingly dynamic and complex business environment

BUILT BY A BROKER FOR A BROKER

With more than 20 years of industry experience, we understand the needs, pain points of brokers and the challenges they face. With the direct collaboration of over 10 brokers in 6 countries, GBO has been in constant development and each module has been designed to answer the industry's daily operational needs and comply with each country's local regulatory requirements.
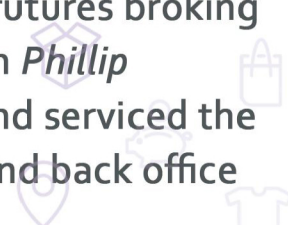

FAST, NIMBLE AND SCALABLE

Our proprietary system reduces day end processing time from 2 hours to 15 minutes. GBO's open API structure makes it nimble. Coupled with Microsoft's latest SQL & .Net technologies, GBO allows you to start small and scale up as your business grows.

REDUCE OPERATIONAL COST

We offer cloud-based service without you having to invest in software or hardware servers of your own. Our sophisticated GBO system helps brokers automate back office operations, resulting in significant increase in productivity and savings in operational cost.

DOMAIN KNOWLEDGE

CyberQuote has more than 20 years of experience in the stocks & futures broking industry. It launched Singapore's first online stock trading platform *Phillip Securities' POEMS* in 1996. Since then it has developed, supplied and serviced the industry with a comprehensive suite of systems including middle and back office systems.

MORE ADVANTAGES, MORE POSSIBILITIES

Scalable Architecture
GBO scales as demand grows and easily adapts to any IT environment.

Data Agnostic
Pick a market data provider, execution venue and clearing house that you are comfortable to work with. Or, take advantage of an array of reliable pre-integrated vendors. The choice is yours.
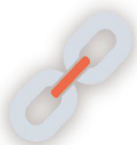

Affordable
Flexible pay-as-you-use pricing plans are aligned with our clients business model and growth strategies. We offer affordable usage-based pricing.
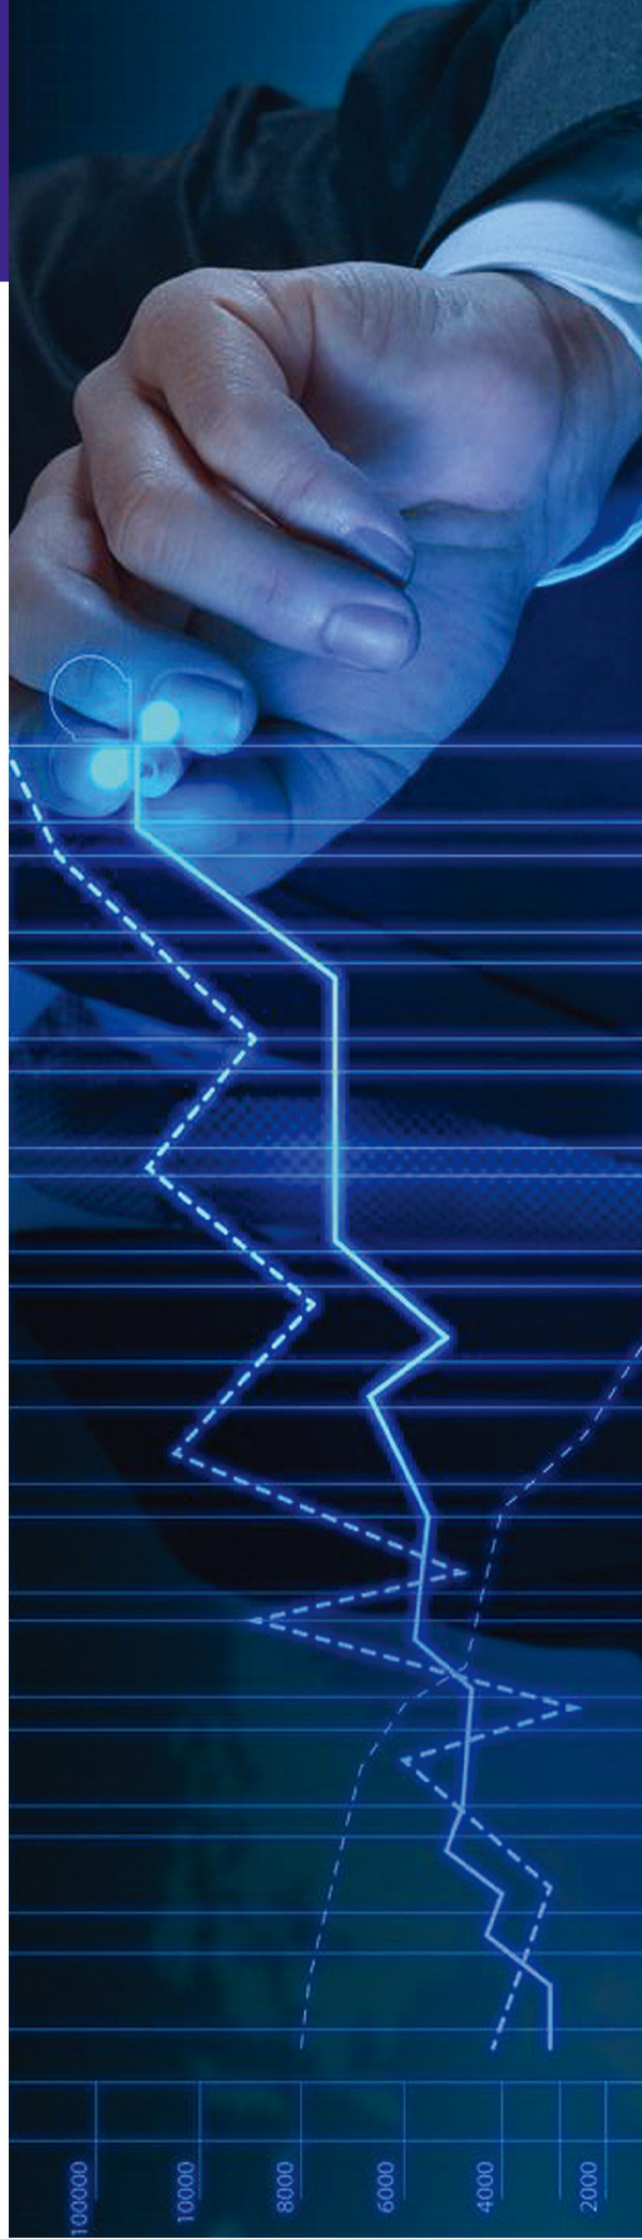

GBO Localisation
GBO is adaptable to local regulatory requirements and has been deployed in 6 countries.

Open APIs
Connect to 3rd party front-end trading platforms and middle processing platforms with open APIs.

RELIABLE CUSTOMER CARE

CyberQuote endeavours to provide reliable customer care. Vigilant in our pursuit of efficient, organized technology innovation and after-sale support, we strive to be your trusted partner to build a long-term relationship.

ABOUT CYBERQUOTE

CyberQuote is an established name with more than 20 years experience in serving the financial industry. We specialize in financial training and Fin-Tech solutions such as securities trading systems. With a proven reputation for service excellence, we endeavour to build long term relationships with our customers and business partners.

Comprehensive Support

CyberQuote provides different tiers of technical support which can be up to 24*7 based on different needs.

Technology that is Fast, Nimble and Scalable

Our proprietary system reduces day end processing time from 2 hours to 15 minutes. GBO's open API structure makes it nimble. Coupled with Microsoft's latest SQL & .Net technologies, GBO allows you to start small and scale up as your business grows.
